

1. Trot $\frac{2}{3}$ the length of the straightaway on the right diagonal. Stop.
2. Turn left to face the opposite corner.
3. Canter on the right lead to the mid-point and continue to canter a circle to the right.
4. Stop. Trot the second half of the diagonal line on the right diagonal to the rail. Stop.
5. Turn right, trot the curve and down the rail on the left diagonal. Return to the line-up without stopping.
